MEMORANDUM FOR: Deputy Director for Processing
Deputy Director for Applications
Chief, Management Staff
Chief, Special Projects Staff

Dugan
5/1/77

SUBJECT : Processing of CDS Traffic for the DDO

REFERENCES : a. Memo to D/ODP fm [] DDO, dtd 23 Aug 76, STAT
Subject: DDO CDS Traffic Requirements
b. Memo to D/OJCS fm [] DDO, dtd 10 Apr 76, STAT
Subject: ADP Resource Requirements

1. An examination of the references raises questions in my mind regarding the allocation of ODP computer resources in GC-47 to store and retrieve CDS cable traffic for the DDO. Paragraph 4 of Tab C to Attachment 1, describes how the DDO plans to use the GC-47 computers to process CDS cable traffic and replace a portion of the WALNUT storage system. The description sounds a great deal like SAFE. I would like to have this requirement examined in depth to see whether there is any justification for providing this capability on the GC-47 system rather than on SAFE. If it looks like SAFE can do the job, I would like a proposal from the C/SPS regarding how we can incorporate this requirement into the SAFE program.

2. All addressee's need to participate in preparing a response to this memorandum. I would like the Chief, Management Staff to coordinate the preparation of this response.
